FORMS OF PAYMENT

Feria Valencia offers the following forms of payment, up to 7 days before assembly begins:

1. Bank Transfer to one of the following account numbers:

Banco	IBAN	Swift (BIC)
CAIXABANK	ES84 2100 8681 5202 0010 4438	CAIXESBBXXX
BBVA	ES84 0182 5941 4102 0150 5396	BBVAESMM
SANTANDER	ES19 0049 1827 8021 1043 8817	BSCHEMM

2. Make cheques payable to 'Feria Muestrario Internacional de Valencia' (in EUR, **TRADE FAIR NAME**).

3. Credit Card

If less than 7 days before assembly, cash payment by bank transfer or credit card.

Please send payment confirmations to:

·Treasury Office: Phone: +34 963 861 292 - E.mail: tesoreria@feriavalencia.com

For any questions, please contact:

2024

TRADE FAIR:

Exhibiting Firm:

Contact:

Stand Number:

E-mail:

As a precautionary measure for any incident that may occur during your participation at the fair, FERIA VALENCIA offers the possibility of contracting various insurance policies, of which INSURANCE AGAINST FIRE AND FLOODING is the only one OBLIGATORY REQUIRED.

To contract this service, it is necessary to fill in this form.

1. OBLIGATORY FIRE AND FLOOD DAMAGE INSURANCE

The abovementioned exhibiting firm DECLARES, for insurance coverage matters, under its responsibility the declared values. In case of not filling in the corresponding inventory, (stated below) the following values per every 16 sg.m will be charged: Content: 2.400 euros - Stand: 450 euros.

And demands also the insurance which, with a voluntary character, the Fair puts at its disposal for the following risks and amounts:

QUANTITY	TYPE OF MATERIAL	EUROS
<input type="text"/>	Contents of stand	<input type="text"/>
<input type="text"/>	Merchandise	<input type="text"/>
<input type="text"/>	Decoration and furniture	<input type="text"/>
SUBTOTAL		<input type="text"/>
Stand structure (not included in insurance against theft)		<input type="text"/>
TOTAL		<input type="text"/>

NOTE: Attacher inventory with economic valuation and photos

2. THEFT (Not pilferage) YES NO
3. BREAKAGE DURING THE EXHIBITION YES NO
4. CIVIL LIABILITY COVERING DAMAGES TO THIRD PARTIES YES NO

DEADLINE FOR SENDING THIS FORM: 4 WORKING DAYS BEFORE SET-UP. ANY APPLICATION RECEIVED WITH LESS THAN 4 WORKING DAYS BEFORE THE START OF SET UP, WILL IMPLY (RATE 2) AVAILABILITY OF ALL REFERENCES IS NOT GUARANTEED.
PLEASE SEND THIS FORM BY E-MAIL: servicecenter@feriavalencia.com

Date, signature, and company stamp

RATES AND CONDITIONS

2024

Rates (VAT not included)

Compulsory fire insurance and flood damage (*) (**)	3‰
Voluntary insurance against theft (not pilferage) (*) (**)	3‰
Voluntary insurance of breakage during the Fair	5‰
Voluntary insurance of civil liability (cover 600.000 euros)	55 euros

(*) In the case of ANTIQUE and the JELLEWERY AND WATCHMAKING FAIR it will be 7‰
(**) In the case of the AUTOMOBILE TRADE FAIR it will be 1‰

1. Fire and flood damage.

The Fair offers a general insurance policy against fire and damage by flooding, covering all merchandise and the structure of the stands of exhibitors, who are obliged to declare their full value and pay the corresponding insurance premium.

2. Theft (not pilferage).

Voluntary insurance against theft does not include pilferage. During the opening hours of the fair, and during the periods set aside for setting up and dismantling, the exhibitor is directly responsible for the security of goods on exhibit in its stand.

3. Breakages during the Fair.

This policy covers risks of breakage that goods may suffer during the time they are being exhibited on the stand, including unpackaging and packaging operations on the premises for subsequent display or removal goods, whoever the person or people causing the damage may be. This policy is therefore much wider in scope and coverage than the policy described in point 3.

4. Civil Liability.

To avoid the application The Civil liability policy covers damages with respect to third parties occurring as a result of its participation in the fair. Independently of obligation incurred by exhibitors of adopting all such safety and protection measures as required by current legislation. There is deductible coverage per claim of 150 euros.

5. Proportional Rule.

To avoid the application of the proportional rule, exhibitors are required to state the total value of all exhibited goods, including stand decoration and installations, when taking out Compulsory Fire and flooding as well as the Voluntary Theft Insurance policies. In the event of not filling out the corresponding inventory, the following values will be fixed for each 16m² module: Content: 2,400 euros - Stands: 450 euros.

6. Validity of Policies.

Insurances policies only provide coverage during the officially stipulated periods for setting-up, the fair itself, and subsequent dismantling. For this purpose, and in the exhibitor's own interest, we strongly recommend filling the form in and returning it by the given deadlines.

7. General Conditions.

In all cases, the general and specific conditions stipulated in the Trade Fair's policy with the Insurance Company will be applicable. In case there is any private fire and damage by flooding insurance agreements held by exhibitors certificate from your Insurance Company must be supplied expressly stating that it "renounces any right to reclaim against FERIA VALENCIA". In any case, "loss of profit" is not included.

Certificate and documentation must be sent to: servicecenter@feriavalencia.com

8. VAT.

Application current VAT.

9. EXAMPLE 1

Company ABC has 128 sq.m. How is calculated the obligatory insurance?

- Numer of modules = $128 / 16 = 8$
- For each module of 16 sq.m, the company has to pay 3‰ of the content (2.400€) and the stand (450€)
- $2.400€ + 450€ = 2.850€ \times 8 \text{ modules} = 22.800€$
- $22.800€ \times 3‰ = 68,40€$ is the amount of the insurance.

EXAMPLE 2

Company ABC declares goods for a value of 30.000€. How is calculated the obligatory insurance?

- $30.000€ \times 3‰ = 90,00€$ is the amount of the insurance.

E-mail:	

The present document is an application form for electricity supply in **Feria Valencia**, mainly for lighting.

The exhibitor must request, through the present document, the power and circuit breaker panel boards required during the fair. Both services are supplied by **Feria Valencia** for all stands.

Charges for circuit breaker panel boards and 24 hour services are according to the power requested (both are charged to the assembling company or the exhibitor):

RATES (VAT not included)

CIRCUIT BREAKERS-DIFFERENTIAL (CONTRACT REQUIRED)	RATE 1	RATE 2	UNITS
Service entrance, single-phase 3kW general circuit breaker panel board (230 V, up to 16 amps) and installation certificate.	35,00 €	43,75 €	
Service entrance, three-phase 9kW general circuit breaker panel board (400 V, up to 16 amps) and installation certificate.	55,00 €	68,75 €	
Service entrance, three-phase 12kW general circuit breaker panel board (400 V, up to 25 amps) and installation certificate.	76,00 €	95,00 €	
Service entrance, three-phase 18kW general circuit breaker panel board (400 V, up to 32 amps) and installation certificate.	100,00 €	125,00 €	
Service entrance, three-phase 36kW general circuit breaker panel board (400 V, up to 63 amps) and installation certificate.	300,00 €	375,00 €	
NOTE: The three-phase general circuit breaker panel boards have 3P+N+E female CETAC sockets for the connection of the necessary distribution panel boards, which may be rented.			
PERMANENT 24 HOUR POWER SUPPLY	RATE 1	RATE 2	UNITS
24 hour electricity service up to 2000 watts (connection, protection and consumption). Only available for perishable goods at the exhibition.	165,00 €	206,25 €	
OPTIONAL DISTRIBUTION PANEL BOARDS	RATE 1	RATE 2	UNITS
Three-phase 9kW distribution panel board (400V, up to 16 amps). Includes three, 16 amps magnetothermal circuit breakers for three 2P+E female CETAC sockets.	34,00 €	42,50 €	
Three-phase 12kW distribution panel board (400V, up to 25 amps). Includes six, 16 amps magnetothermal circuit breakers for three 2P+E female CETAC sockets.	45,00 €	56,25 €	
Three-phase 18kW distribution panel board (400V, up to 32 amps). Includes six, 16 amps magnetothermal circuit breakers for six 2P+E female CETAC sockets.	82,00 €	102,05 €	
ADDITIONAL CETAC SOCKETS	RATE 1	RATE 2	UNITS
10/16 Amp 2P + T Plug	3,50 €	4,375 €	
32-Amp plug 3P+N+T	9,00 €	11,25 €	
63-Amp plug 3P+N+T	44,41 €	55,51 €	

Charges for electricity consumption will be charged to the exhibitor, according to the total power set up, which will be the sum of the power rating in the general circuit breaker panel boards required:

FAIR DURATION (DAYS) / PRICE OF KW POWER SET UP IN GENERAL CIRCUIT BREAKER PANEL BOARDS (EUROS)

1 day..... 17,34 € 2 days..... 28,24 € 3 days..... 34,90 € 4 days..... 39,98 €
 5-7 days..... 50,33 € 8-9 days..... 58,93 €

The closing date for contracting these services is one month prior to the start of the fair. **Feria Valencia** reserves the right to reject any applications received after the said date.

DEADLINE FOR SENDING THIS FORM: 1 MONTH BEFORE SET-UP. ANY APPLICATION RECEIVED WITH LESS WORKING DAYS BEFORE THE START OF SET UP, WILL IMPLY (RATE 2). AVAILABILITY OF ALL REFERENCES IS NOT GUARANTEED. PLEASE SEND THIS FORM BY E-MAIL: servicecenter@feriavalencia.com

Date, signature, and company stamp

IMPORTANT:

In order for the correct setting up of the panel boards, a plan of their location (with the limits given in centimetres) must be sent a month before the start of the exhibition to the following this email: servicecenter@feriavalencia.com.
On the plan, the walls of the stand must be labelled with "neighbour" or "corridor" so that the plan can be correctly read. Please note that the service entrance is normally done via outlet boxes found on the floor and so the outlet boxes or panel boards used for the stand must be accessible at all times and must not be covered by any platforms or other surfaces which cannot be easily and immediately removed.

SERVICE CONDITIONS:

- In case of cancellation of a service one month prior to the start of an exhibition, 25% of the corresponding charge must be paid.
- Any change or cancellation made to a service which has already been contracted, and which has already been rendered or set up, must be paid entirely and a new charge for the new service contracted will apply.
- The service entrance and general circuit breaker panel boards, according to the application sent, are included.
- The electrical certification of the stand emitted by the contracted assembling company is included.
- The service is a rental service and so any damages, loss or anomaly in the equipment will always be charged to the assembling company.
- The electricity supply for the stand other than that of the general circuit breaker panel board is not included.
- The differential protection for all the general circuit breaker panel boards has a sensitivity of 30mA, as established by the Low Power Electromagnetic Regulations (R.E.B.T. in Spanish, Royal Decree 842/2002) and the Additional Technical Instructions (see legally binding regulations annex for the electricity supply in Feria Valencia).
- Each general circuit breaker panel board has a Schuko single-phase base, of up to 16 amps, for the assembly of the stand. The final electricity connection to the stands will start 4 days before the start of the fair, provided that the electricity supply for the stand has been set up and that the certification is positive, according to the R.E.B.T. regulations, the Additional Technical Instructions and the Feria Valencia regulations.
- The 9kW, three-phase general circuit breaker panel boards (up to 16 amps), 12kW (up to 25 amps), 18kW (up to 32 amps) and 36kW (up to 63kW) have 3P+N+E female CETAC sockets for the connection of the required distribution panel boards, and can also be rented (up to 32 amps).

Notes:

The power consumption rates are likely to upgrade/modification.
Electricity and drive circuit consumption will be charged according to the POWER of the general circuit breaker panel boards installed.
Connection of stands to electrical supply will begin 4 days before the opening of the fair.
The rates indicated are subject.
The supply of power is a subcontracted service and FERIA VALENCIA cannot be responsible for power failures due to external circumstances

COMPULSORY MINIMUM REQUIREMENTS FOR STAND SUPPLY CONNECTION BASED ON SPANISH LEGISLATION

All electrical installations must be made with 1Kv. Conductor or in tubing, free from halogens and with reduced opacity.

CONDUCTORS

All electrical installations shall be made using electrical conductors rated at 1KV. (1000 V); mailing this 300, 500 and 750 V. Conductors may be used provided that they are enclosed within a protective tube ITC- BT 34, 6-2, 6-3, ITC- BT- 20, 2.2-1 and 2.2-2, ITC- BT-28.4. Conductors shall conform to the Spanish Standard UNE 21123-4 or 5, equivalent standard (ICE-502)
The minimum diameter of branch lines (for lighting and sockets) shall be 2.5mm, protected with heads with a maximum of 16 A. Joints and branches shall be protected using boxes.

PROTECTION

All installations shall be protected using a general 30 mA. differential. The chassis of all machinery and electrical equipment must be earthed. A general magnetothermal device rated in accordance with line intensity and general power consumption (conforming to international standards) must be used. Each branch line shall be protected by a magnetothermal device with a maximum of 16 A. and a minimum circuit-breaking capacity of 6 KA. (although 10 KA. is recommendable) (ITC-BT 34 3.1 and 3.3); failing this, ceramic cartridge fuses may be used with a maximum of 16 A., type (gl). (ITC-BT-022 1-1 a&b). Whatever the distribution plans used, the protection of installations for electrical equipment accessible to the general public must be equipped with devices with a maximum residual differential current of 30mA.

POWER POINT AND SOKETS

One single cable or Flex must be connected to one power point. Multiadaptors must not be used; multiple bases must not be used, except for mobile multiple bases connected to a fixed base with a flex measuring no longer than a maximum of 2m. (following standars ITC- BET 34-6, 4-4). All sockets will be earthed. The sockets installed in the ground will have appropriate protection against water leakages and will be installed at a distance of over one metre from any water outlet.

MOTORS

All motors with power exceeding 0.75 kilowatts must be equipped with a limited-intensity starting system, as established by current regulations (ITC-BT- 47-6).

LIGHTING

Lamps located less than 2.5 metres from the ground, or in places accessible to people, must be strongly fixed and located in such a way that they are not a risk for people and there is no risk of any materials setting on fire.
Any lighting which reaches high temperatures must be located far enough from any flammable materials.

EARTHED CONNECTIONS

The metallic structure of the stands must be earthed.

NEON SIGNS

Individual magnetothermal circuit breakers for each step-up transformer installed will be available.
Signs with their lower end at a distance less than 2.5 metres from the ground must be covered with an adequate dielectric cover.
Signs which are located higher than this must have all voltage areas insulated.

ELECTRICAL SYSTEM

The electricity supply must be a low power supply and must be set-up by a qualified installation company. Individuals or legal entities who wish to carry out such activities in Spain must submit a declaration with the requirements established by law to the corresponding body of the Autonomous Community in which they wish to settle. The corresponding body of the Autonomous Community will assign a company identification number. Once the electrical system has been set up, a qualified installation company will check the installation and will give the corresponding low voltage certificate (Certins page), a copy of which shall be given to the Electronic Services Department of Feria Valencia in order to connect the electricity supply.

2024**NOTES:**

Available to electrical installer at the FERIA VALENCIA Electrical Services Section is an abstract of the Low Voltage Electrotechnical Regulations BT and Regulation referring to high voltage lighting installations.

All electrical installations must be comply with the new standars (Real Decreto 842/2002 passed on 2 August 2002).

OBSERVATIONS:

FERIA VALENCIA has fixed power points with a maximum of 50KW for lighting and 35KW for machinery. All services must use these power points. In the event of needing power supply for machinery requiring more than 35 KW in one single power point, the Technical Services will indicate the exact point where it can be connected, with the applicant assuming the costs of supply and surge protector. Power points for lighting have a max of 18KW/ in a 5-pole 32A outlet. Exhibitors with lighting needing more power can fraction it and connect to the FERIA VALENCIA fixed power points. FERIA VALENCIA supplies a maximum electrical power of 3000W, single phase 230V.

All machines or device using electronic components which may be deprogrammed due to power cuts are compulsorily required to have UPS (Uninterrupted power supply) resides the necessary harmonic filters for disruptions and reactive power condensers, as regulated in the new ITC- BT-43 2.7 standards.

For power over 50kW in a single socket, and for each exhibitor, a project must be drawn-up by the contracted assembling company, and must be legalised in the PROP of Valencia's Regional Government (Generalitat Valenciana), and must be handed in at the Electronic Services Office of FERIA VALENCIA, together with the installation certificate. Certificates for the electrical connection delivered to the Electrical Services Department with less than four days before the opening the fair, will be subject to a minimum moratorium of eight hours for connection (prior validation that the electrical installation is correctly finalized).

IMPORTANT:

See application forms for electrical service power and lighting of Feria Valencia, on the supply of services offered exclusively by FERIA VALENCIA."

2024

TRADE FAIR:	
Exhibiting Firm:	
Contact:	Stand Number:
E-mail:	

The exhibitor must request, through the present document, the power and circuit breakers boxes for power/machinery required during the fair. Both services are supplied by Feria Valencia for all stands, up to 80Amps (40kw)
 Charges for protection boxes/circuit breakers boxes according to the power requested (All installations will be protected by 30mA differential):

RATES (VAT not included)

CIRCUIT BREAKERS BOXES - DIFFERENTIAL (CONTRACT REQUIRED) 400V, INCLUDES INSTALLATION CERTIFICATE	RATE 1	RATE 2	UNITS
Power supply lines, 3-phase main electricity protection box. 7.5 kw (up to 16A)	91,00 €	113,75 €	
Power supply lines, 3-phase main electricity protection box. 10 kw (up to 20A)	115,00 €	143,75 €	
Power supply lines, 3-phase main electricity protection box. 15 kw (up to 32A)	145,00 €	181,25 €	
Power supply lines, 3-phase main electricity protection box. 24 kw (up to 50A)	235,00 €	293,75 €	
Power supply lines, 3-phase main electricity protection box. 30 kw (up to 63A)	300,00 €	375,00 €	
Power supply lines, 3-phase main electricity protection box. 40 kw (up to 80A)	380,00 €	475,00 €	

NOTE: The three-phase general circuit breaker panel boards have 3P+N+E female sockets for the connection and differential 30mA (See warnings at the end of this form)

PROTECTION BOXES / CIRCUIT BREAKERS FOR HIGH VOLTAGES (OPTIONAL)

- Protection boxes / circuit breakers boxes for high voltages are not included (request a quote):
- Design plan and installation completion certificate for this plan, both carried out by an approved technician. (Legally required)
 - Power supply cables of over 40 metres in length
 - Lifting machinery, etc., needed for connecting the lines.

PROTECTION BOXES / CIRCUIT BREAKERS FOR HIGH VOLTAGES (OPTIONAL)	RATE 1	RATE 2	UNITS
Power supply lines, 3-phase main electricity protection box. 51 kw (400V, up to 100amps) and installation certificate.	724,00 €	905,00 €	
Power supply lines, 3-phase main electricity protection box. 60 kw (400V, up to 125amps) and installation certificate.	1.042,00 €	1.302,50 €	
Power supply lines, 3-phase main electricity protection box. 80 kw (400V, up to 160amps) and installation certificate.	1.168,00 €	1.460,00 €	
Power supply lines, 3-phase main electricity protection box. 125 kw (400V, up to 250amps) and installation certificate.	1.336,00 €	1.670,00 €	
Power supply lines, connection, and certification for a protection box for over 80 amps, property of the client.	In accordance with quote. Consumption depends on the total nominal power (see previous lists) of the protection boxes installed.		

Charges for electricity consumption will be charged to the exhibitor, according to the total power set up, which will be the sum of the power rating in the general circuit breakers boxes required:

FAIR DURATION (DAYS) / PRICE OF KW POWER SET UP IN GENERAL CIRCUIT BREAKER PANEL BOARDS (EUROS)

1 day..... 10,6€	2 days..... 15,64 €	3 days..... 20,00 €	4 days..... 21,34 €
5-7 days..... 22,00 €	8-9 days..... 23,92 €		

The closing date for contracting these services is one month prior to start of the fair. FERIA VALENCIA reserves the right to reject any applications received after the said date.

DEADLINE FOR SENDING THIS FORM: 4 WORKING DAYS BEFORE SET-UP. ANY APPLICATION RECEIVED WITH LESS THAN 4 WORKING DAYS BEFORE THE START OF SET UP, WILL IMPLY (RATE 2) AVAILABILITY OF ALL REFERENCES IS NOT GUARANTEED.
 PLEASE SEND THIS FORM BY E-MAIL: servicecenter@feriavalencia.com

Date, signature, and company stamp

ADDITIONAL CETAC SOCKETS (FOR SALE)	RATE 1	RATE 2	UNITS
10/16 Amp 2P + T Plug	3,50 €	4,375 €	
32-Amp plug 3P+N+T	9,00 €	11,25 €	
63-Amp plug 3P+N+T	44,40 €	55,51 €	

2024**DESIGN PLANS WITH INSTALLATION COMPLETION CERTIFICATES**

In accordance with Spanish legislation, all stands with an electrical power outlet of more than 50 kw need to have a technical design and installation certificate, carried out by a competent technician.

If each individual power outlet does not exceed 50 kw, then this plan will not be necessary.

FEES for carrying out the design plan with installation completion certification (including VAT):

Up to 100 kw of total power installed in protection boxes at the stand: 841,00 €

Over 100 kw of total power installed in protection boxes at the stand: 1.261,00 €

Possibility of working with 300 mA residual current circuit breakers (RCCBs)

Installations at [Feria Valencia](#) are governed by the Spanish Low-Voltage Regulation, requiring that all machines and equipment have protective elements against indirect contact, with a sensitivity of 30 milliamperes. However, given the specific nature of Fimma, the Regional Department of Industry will permit, in this exceptional case, and for the duration of this event, the installation of 300 mA RCCBs for machinery (but not for lighting). Authorisation is granted on the condition that, prior to commencement of the event, the installations are reviewed by an Authorised Control Agency (OCA) contracted by [Feria Valencia](#). This OCA will review your stand at the same time as [Feria Valencia's](#) sets up the electrical supply to your stand, which will be done once the report has been received from your electrical installer.

Therefore, the steps to follow are:

- 1.- Carry out the electrical installation for your stand.
- 2.- Issue of installation completion report (and Design, in the case of more than 50 kw in a single power outlet).
- 3.- Review of the electrical installation of your stand by the OCA, issue of report, and subsequent electrical supply to your stand.
- 4.- If irregularities are found during the review of your stand, these must be corrected before the event commences.

In order to install a 300 mA RCCB in their machinery, exhibitors will need to inform Feria Valencia if their machinery requires a RCCB a month before the event commences. If the request is not made in time, and your machinery requires it, we will try to resolve the situation insofar as possible.

My machine requires a 300 mA RCCB to function, having therefore a leakage current of more than 30 mA.

DEADLINE FOR SENDING THIS FORM: 1 MONTH BEFORE SET-UP. ANY APPLICATION RECEIVED WITH LESS WORKING DAYS BEFORE THE START OF SET UP, WILL IMPLY (RATE 2).

AVAILABILITY OF ALL REFERENCES IS NOT GUARANTEED.

PLEASE SEND THIS FORM BY E-MAIL: servicecenter@feriavalencia.com

Date, signature, and company stamp

2024**IMPORTANT:**

In order for the correct setting up of the panel boards, a plan of their location (with the limits given in centimetres) must be sent a month before the start of the exhibition to the following this email: servicecenter@feriavalencia.com.
On the plan, the walls of the stand must be labelled with "neighbour" or "corridor" so that the plan can be correctly read. Please note that the service entrance is normally done via outlet boxes found on the floor and so the outlet boxes or panel boards used for the stand must be accessible at all times and must not be covered by any platforms or other surfaces which cannot be easily and immediately removed.

SERVICE CONDITIONS:

- In case of cancellation of a service one month prior to the start of an exhibition, 25% of the corresponding charge must be paid.
- Any change or cancellation made to a service which has already been contracted, and which has already been rendered or set up, must be paid entirely and a new charge for the new service contracted will apply.
- The service entrance and general circuit breaker panel boards, according to the application sent, are included.
- The electrical certification of the stand emitted by the contracted assembling company is included.
- The service is a rental service and so any damages, loss or anomaly in the equipment will always be charged to the assembling company.
- The electricity supply for the stand other than that of the general circuit breaker panel board is not included.
- The differential protection for all the general circuit breaker panel boards has a sensitivity of 30mA, as established by the Low Power Electromagnetic Regulations (R.E.B.T. in Spanish, Royal Decree 842/2002) and the Additional Technical Instructions (see legally binding regulations annex for the electricity supply in Feria Valencia).
- Each general circuit breaker panel board has a Schuko single-phase base, of up to 16 amps, for the assembly of the stand. The final electricity connection to the stands will start 4 days before the start of the fair, provided that the electricity supply for the stand has been set up and that the certification is positive, according to the R.E.B.T. regulations, the Additional Technical Instructions and the Feria Valencia regulations.
- The 9kW, three-phase general circuit breaker panel boards (up to 16 amps), 12kW (up to 25 amps), 18kW (up to 32 amps) and 36kW (up to 63kW) have 3P+N+E female CETAC sockets for the connection of the required distribution panel boards, and can also be rented (up to 32 amps).

Notes:

The power consumption rates are likely to upgrade/modification.
Electricity and drive circuit consumption will be charged according to the POWER of the general circuit breaker panel boards installed.
Connection of stands to electrical supply will begin 4 days before the opening of the fair.
The rates indicated are subject.
The supply of power is a subcontracted service and FERIA VALENCIA cannot be responsible for power failures due to external circumstances

COMPULSORY MINIMUM REQUIREMENTS FOR STAND SUPPLY CONNECTION BASED ON SPANISH LEGISLATION

All electrical installations must be made with 1Kv. Conductor or in tubing, free from halogens and with reduced opacity.

CONDUCTORS

All electrical installations shall be made using electrical conductors rated at 1KV. (1000 V); mailing this 300, 500 and 750 V. Conductors may be used provided that they are enclosed within a protective tube ITC- BT 34, 6-2, 6-3, ITC- BT- 20, 2.2-1 and 2.2-2, ITC- BT-28.4. Conductors shall conform to the Spanish Standard UNE 21123-4 or 5, equivalent standard (ICE-502)
The minimum diameter of branch lines (for lighting and sockets) shall be 2.5mm, protected with heads with a maximum of 16 A. Joints and branches shall be protected using boxes.

PROTECTION

All installations shall be protected using a general 30 mA. differential. The chassis of all machinery and electrical equipment must be earthed. A general magnetothermal device rated in accordance with line intensity and general power consumption (conforming to international standards) must be used. Each branch line shall be protected by a magnetothermal device with a maximum of 16 A. and a minimum circuit-breaking capacity of 6 KA. (although 10 KA. is recommendable) (ITC-BT 34 3.1 and 3.3); failing this, ceramic cartridge fuses may be used with a maximum of 16 A., type (gl). (ITC-BT-022 1-1 a&b). Whatever the distribution plans used, the protection of installations for electrical equipment accessible to the general public must be equipped with devices with a maximum residual differential current of 30mA.

POWER POINT AND SOKETS

All sockets will be earthed. The sockets installed in the ground will have appropriate protection against water leakages and will be installed at a distance of over one metre from any water outlet.

MOTORS

All motors with power exceeding 0.75 kilowatts must be equipped with a limited-intensity starting system, as established by current regulations (ITC-BT- 47-6).

LIGHTING

Lamps located less than 2.5 metres from the ground, or in places accessible to people, must be strongly fixed and located in such a way that they are not a risk for people and there is no risk of any materials setting on fire.
Any lighting which reaches high temperatures must be located far enough from any flammable materials.

EARTHED CONNECTIONS

The metallic structure of the stands must be earthed.

NEON SIGNS

Individual magnetothermal circuit breakers for each step-up transformer installed will be available.
Signs with their lower end at a distance less than 2.5 metres from the ground must be covered with an adequate dielectric cover.
Signs which are located higher than this must have all voltage areas insulated.

ELECTRICAL SYSTEM

The electricity supply must be a low power supply and must be set-up by a qualified installation company. Individuals or legal entities who wish to carry out such activities in Spain must submit a declaration with the requirements established by law to the corresponding body of the Autonomous Community in which they wish to settle. The corresponding body of the Autonomous Community will assign a company identification number. Once the electrical system has been set up, a qualified installation company will check the installation and will give the corresponding low voltage certificate (Certins page), a copy of which shall be given to the Electronic Services Department of Feria Valencia in order to connect the electricity supply.

APPLICATION FORM

NOTES:

Available to electrical installer at the FERIA VALENCIA Electrical Services Section is an abstract of the Low Voltage Electrotechnical Regulations BT and Regulation referring to high voltage lighting installations.

All electrical installations must be comply with the new standards (Real Decreto 842/2002 passed on 2 August 2002).

2024

OBSERVATIONS:

FERIA VALENCIA has fixed power points with a maximum of 50KW for lighting and 35KW for machinery. All services must use these power points. In the event of needing power supply for machinery requiring more than 35 KW in one single power point, the Technical Services will indicate the exact point where it can be connected, with the applicant assuming the costs of supply and surge protector. Power points for lighting have a max of 18KW/ in a 5-pole 32A outlet. Exhibitors with lighting needing more power can fraction it and connect to the FERIA VALENCIA fixed power points. FERIA VALENCIA supplies a maximum electrical power of 3000W, single phase 230V.

All machines or device using electronic components which may be deprogrammed due to power cuts are compulsorily required to have UPS (Uninterrupted power supply) resides the necessary harmonic filters for disruptions and reactive power condensers, as regulated in the new ITC- BT-43 2.7 standards.

DESIGN PLAN FOR POWER OUTLETS OF MORE THAN 50 KW

In accordance with Spanish legislation, all stands with an electrical power outlet of more than 50 kw need to have a design plan and installation certificate, carried out by a competent technician (an engineer with expertise in electrotechnics).

If each individual power outlet does not exceed 50 kw, then this plan will not be necessary.

For example, a stand with a lighting outlet of 30 kw and two power outlets of 40 kw, amounting to 110 kw in total, will not need a design plan; a stand with a power outlet of 80 kw a lighting outlet of 30 kw, also amounting to 110 kw in total, will need a design plan.

The data required to carry out the plan will be (see Feria Valencia's regulations on electrical installations):

Owner's details (name, company name, address, Tax ID No.).

Installer's details (name, company name, address, Tax ID No.).

Stand location.

Nominal ratio and power of receivers being installed, along with stand floor plan showing their location.

Security systems and devices employed, distribution and protection boxes, etc.

Schematic diagram of the installation, characteristics of circuit-breaker and protection devices employed, points of use and conductor sections.

Characteristics and conductor sections and conduits to be used.

Sketch of the layout, indicating the location of the different points of use.

Calculations supporting the design, if available.

Basic details of the elements to be hung from the building's structure:

COMPANY:	
Stand Nº :	Location:
EXHIBITION:	

Nº of HANGING POINTS ON THE BUILDING'S STRUCTURE:	
---	--

TOTAL WEIGHT TO BE HUNG	
-------------------------	--

INDICATE ESTIMATED DATE TO LIFT THE STRUCTURE:	
--	--

Indicate if these are TYPE A or TYPE B structures

TYPE A

These are structures comprised of *standard aluminium structural elements* (TRUSS) *either bare or covered in non-flammable cloth* from which individual elements will be hung such as spotlights or banners of known, specific weights

TYPE B

These are all structures that cannot be classified as Type A, such as *carpentry ceilings or wood-covered truss structures*.

DEADLINE FOR SENDING THIS FORM: 1 MONTH BEFORE SET-UP. ANY APPLICATION RECEIVED WITH LESS WORKING DAYS BEFORE THE START OF SET UP, WILL IMPLY (RATE 2). DURING THE ASSEMBLY AVAILABILITY OF ALL REFERENCES IS NOT GUARANTEED AND THE SERVICE WILL BE PROVIDED BY SEPARATE QUOTATION PLEASE SEND THIS FORM BY E-MAIL: servicecenter@feriavalencia.com

Date, signature, and company stamp

2024 INFORMATION/DOCUMENTATION TO BE SUPPLIED BY THE COMPANY APPLYING

The company applying is **RESPONSIBLE** for the truth of the details provided both in the present application form and in the attached documents such as designs, hanging specifications and, particularly, everything relating to the weight and dimensions of every one of the system's elements. Authorisation of the present application will under no circumstances imply that FERIA VALENCIA or its partners in this service will accept any responsibility for the structural solution planned.

For TYPE A structures: The company applying must provide the following documents to rigging@feriavalencia.com

TO BE COMPLETED BY:	to be provided by INSPECTION COMPANY	to be provided by STAND BUILDER
PROJECT: The exact location of the stand must be detailed and the main elements to be used must be described, both the principal structural elements and the elements that are to be hung from them.	YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>
List of weights of all the elements comprising the structure	YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>
Number of rigging points being requested , including a numbered table showing the calculated and proven weight that each rigging point will bear.	YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>
Scale diagrams showing floor elevation measurements of the installation , with a precise indication and identification of each rigging point and of the location of the structural elements and what is intended to be hung from each one. The location and orientation of the stand relative to the pavilion building must be clearly indicated, for example by showing the numbers of the stands adjacent to each façade and whether the façade is on an aisle.	YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>
List of the materials that will be used for structural purposes (TRUSS) and their technical specifications ; quality certificates and EU standardisation certificates for the elements listed must be provided.	YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>
Description of how it is intended to attach the safety system	YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>

Application for Permission to Hang Rigging

11A

APPLICATION FORM

2024

For TYPE B structures: The company applying must provide the same documents as required for TYPE A structures (See TYPE A paragraph) along with the following, complementary documents, to rigging@feriavalencia.com

TO BE COMPLETED BY:	to be provided by INSPECTION COMPANY	to be provided by STAND BUILDER
A written description of the project drafted by a competent specialist. This document must describe and provide full proof of the structural safety of the elements to be hung, to the same level of detail as that of construction plans. A 'competent specialist' is understood to be a practitioner who has trained and holds sufficient qualifications in structural design: an Architect, Structural Engineer, Engineer or Technical Engineer. Technical qualifications will only be accepted from European Union member countries. Special attention must be paid to the technical and construction details in the description of the principal rigging points and of the safety cables, which must be different and independent of each other.	YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>
Valid Civil Liability insurance policy covering the technical author of the project, plus photocopy of latest receipt of payment.	YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>
Certificate of completion of installation: it is compulsory that prior to the structure being raised the technician who has drafted the brief send a completion of installation certificate, guaranteeing that the structure is safe and has been completed as specified in the brief, to the following e-mail address: rigging@feriavalencia.com	YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>

INSPECTION COMPANY (to be completed by the inspection company)		
CHECK OF THE ASSEMBLY	YES <input type="checkbox"/>	NO <input type="checkbox"/>
Is the assembly as specified in the approved brief	YES <input type="checkbox"/>	NO <input type="checkbox"/>
Have any modifications been necessary	YES <input type="checkbox"/>	NO <input type="checkbox"/>
Has the safety system been put in place	YES <input type="checkbox"/>	NO <input type="checkbox"/>

CONTACT DETAILS, PARTNER SUPPLIERS:

Should you require the necessary reports/briefs/specifications to be drafted for you, the following companies are Feria Valencia partners and can provide these services:

- REPORT DRAFTING - TYPE A structures:

SGS TECNOS, S.A: Gerardo Burgos
e-mail: gerardo.burgos@sgs.com

- DRAFTING OF TECHNICAL SPECIFICATIONS - TYPE B structures:

SGS TECNOS, S.A: Gerardo Burgos
e-mail: gerardo.burgos@sgs.com

TERMS AND CONDITIONS

1. Feria Valencia will manage the siting of the anchor points on the ceiling for reasons of safety, risk prevention and maintenance of the building.
2. Exhibitors or stand builders may install their own truss provided they have sent the certificates of conformity to Feria Valencia in advance and these have been accredited and approved by the inspection company, SGS.
3. The Price of the accessory includes installation, handling and removal.
4. Where a structural unit has more than 6 rigging points before it is lifted into position, the applicant will have to use ELECTRICAL (NOT MANUAL) HOISTS and PULLEYS, which it must hire through Feria Valencia. In addition, it must be borne in mind that two units that are structurally different on the ground may NOT be joined together structurally once they have been raised.

DEADLINE FOR SENDING THIS FORM: 1 MONTH BEFORE SET-UP. ANY APPLICATION RECEIVED WITH LESS WORKING DAYS BEFORE THE START OF SET UP, WILL IMPLY (RATE 2).

REQUIREMENTS:

1. The customer's computer should have a TCP/IP protocol configuration and use DHCP for automatic TCP/IP configuration and avail of a browser (Internet Explorer, Mozilla...).
2. The customer will have to avail of one or various sockets to meet its electrical requirements for each computer. Power supply is not included.
3. Since that the number of Internet connections is limited, this service should be applied for at least one month in advance. Verify availability of lines.

TECHNICAL SPECIFICATIONS:

1. This is an Internet Connection Service. The connection with the customer's computer is made generally via WI-FI, although FERIA VALENCIA reserves the right to supply the connection using a copper wire with RJ45 connector if the service characteristics so require.
2. The customer's computer should have a TCP/IP protocol configuration and use DHCP for automatic TCP/IP configuration. This service is provided only for one computer per contracted service.
3. The initial connection will be made by the customer itself with the assistance of the instructions provided by Service Center
4. This connection includes no Antivirus, Firewall or Intrusion Detection Service. It is the customer's own responsibility to provide the necessary security systems, including antivirus and anti-intrusion. The customer commits itself to refrain from entering the FERIA VALENCIA internet systems or of other customers connected to the systems. Despite the security measures implemented by FERIA VALENCIA, and those taken by the customer, there still exists the possibility of some type of security incident, in which case FERIA VALENCIA does not accept responsibility for any possible consequences.
5. FERIA VALENCIA reserves the right to disconnect from the network any computer that may cause or is causing problems to the network as a whole.
6. If you wish to order additional services, please consult our System Department for specifications. sistemas@feriavalencia.com

CONNECTION:

- The details to configure the WIFI connection must be collected at the Service Center Office.
- For cable connection the instructions and ROUTER must be collected at the Service Center Office.

The water and drainage service is supplied exclusively through Feria Valencia from the main network located in the floor of the exhibition pavilions. Each water supply/drainage connection consists of a ½ inch section and drainage of 25mm diameter.

Both the main supply as well as the connections with the exhibitor should be accessible at all times; that is to say, they can not be covered by any fixed element, such as platforms or pavements. If these elements are being used, readily accessible registration covers must be available which require no special tools.

The water supply pressure in the exhibition pavilions are:

PAVILIONS	PRESURE
Level 1, Pavilions 1, 2, 3, 4	2Kg/cm. ²
Level 1, Pavilion 5	4Kg/cm. ²
Level 2, Pavilions 1, 2, 3, 4, 6, 7, 8	4Kg/cm. ²
Level 3, Pavilions 1, 2, 3, 4, 6, 7	3Kg/cm. ²
Pavilion 6 bis	No service

WATER/ DRAINAGE	<input type="checkbox"/>	Number of connections:	<input type="text"/>
Basin	<input type="checkbox"/>	Number:	<input type="text"/>
Filling of basins and pools	<input type="checkbox"/>	Cubic Meters:	<input type="text"/>

RATES (VAT not included) RATE 1 (ON TIME) RATE 2 (AFTER DEADLINE)

· Connection and consumption cost:	T1 210,00 €	T2 262,50 €
· Rental fee for the sink:	T1 50 € (unit/event)	T2 62,50 € (unit/event)
· Cost of filling (up to one cubic metre):	T1 30 € - 5 € per additional cubic metre	T2 37,50 € - 6,25 € per additional cubic metre

The compressed air service is available in exhibition pavilions 1 to 5 on all levels. Feria Valencia will supply the connection at the location, using pressure hoses with 13 mm. inner diameter and 19 mm. external diameter, sufficient for a supply of up to 1.500 litres / minute, with a ½ inch valve with screw thread. The connection to the supply and with machines is the responsibility and task of the exhibitor.

The exhibitor must indicate the volume it expects to consume in litres/minute, applying the coefficient of simultaneity it considers suitable.

The supply points and the connection points used by the exhibitor must be readily accessible at all times; that is to say, they can not be covered with any fixed element, such as column coverings, platforms or pavement. If these elements are being used, readily accessible registration covers must be available, which do not need special tools.

A minimum pressure of 8 bars is guaranteed at any point in the installation. The pressure should be regulated by the exhibitor in function of its needs and using its own means.

Before beginning the assembly or construction of its stand, the exhibitor, or other company working on its behalf, must present detailed plans for prior approval. The stand must fulfil the regulations included in the Application for Participation form (see Conditions), as well as the Rules and Regulations for Setting-up and dismantling.

In this present form, all work to be undertaken must be clearly specified, and must comply with the sketch of the stand (obligatory requirement), which must also be presented to the organization of the trade fair for approval by the Technical Department at FERIA VALENCIA.

In addition, to use cover of general services and extensions of opening and closing times, decorators will be obliged to pay the detailed rates in the reverse, upon application for assembly passes.

OUTDOOR / INDOOR TEAM BUILDING:

We offer you a whole range of activities to help you maximise your visit to the Fair, activities that help strengthen team spirit and a sense of belonging, or just simply allow you to release stress and to enjoy your stay at our facilities.

Our activities are tried and tested, with a focus on professionalism and humour, and will give participants an unforgettable emotional experience as well as excellent training in group development for their organisation.

- Team marbling (teams work together to build an aqueduct, includes different tests).
- Formula 1 team (teams work together to build cars, and then compete in a race).
- Company quiz show (highly entertaining quiz show, with company-related questions).
- City treasure hunts (treasure hunt in Valencia's historical centre).
- Multi-activities (a series of tests involving team working).
- Laughter therapy workshop.

DEADLINE FOR SENDING THIS FORM: 4 WORKING DAYS BEFORE SET-UP. ANY APPLICATION RECEIVED WITH LESS THAN 4 WORKING DAYS BEFORE THE START OF SET UP, WILL IMPLY (RATE 2) AVAILABILITY OF ALL REFERENCES IS NOT GUARANTEED.
